Juniper Networks Training at George Mason University, Fairfax Campus

George Mason University is currently offering Juniper Networks Routers training courses. These introductory hands-on classes are convenient for working professionals, and will prepare you for the Juniper Networks Certified Internet Associate – Enterprise Routing (JNCIA-ER) exam offered at local testing centers.

- **Operating Juniper Networks Routers in the Enterprise (OJRE)**
PEVS 0300 F01
 - This instructor-led course combines lectures and labs with time for hands-on experience with J-series platforms and JUNOS software. Learn to install, configure, conduct operational analysis, and troubleshoot Juniper Networks routers in the enterprise.
 - **Save more than 50% of the course costs!** George Mason University is offering the OJRE program for only \$1500 (\$995 for current Mason students).
 - Juniper-authorized training provides a path to Juniper certification.
 - Ten three-hour sessions are included in this 30-hour course (students receive 3.0 CEUs for participation).
 - Learning is spaced over a four-week timeframe and class times are perfect for working professionals and students. Two sessions will be offered in the spring semester. Session 1 will meet on Saturday February 6, 13, 20, and 27 from 9am – 5pm. Session 2 will meet on Saturday April 10, 17, 24, and May 1 from 9am – 5pm.
 - Intended for end users of J-series platforms such as network engineers, support personnel, resellers, and others responsible for implementing Juniper Networks Enterprise Routing products.
