ECE 220 Signals and Systems I
Fall 2006
End-of-term Survey

What is your opinion of ECE 220? This is your chance to give me feedback that I can use to improve future versions of ECE 220. **You do not have to put your name on this form.** When you turn in the survey, I'll check your name off my list. You will receive full RAT credit for today (12/4/06) if you **answer each question on this form**. RAT credit does not depend on what you write, but you must say something for each question. Your feedback is important! Please be honest and tell me what you think.

Note: I will ask a student to deliver these surveys to the ECE office. I will not have access to them until after the semester is over and grades are turned in.

1. What do you like best about ECE 220? Why?

2. What do you like least about ECE 220? Why?

3. What was the hardest topic covered in ECE 220 for you to understand? Why was it hard? Do you have any suggestions for how to improve the coverage of this hard material?

4. Were the lab assignments useful in helping you to understand the lecture material? How could the labs be improved?

5. List at least one suggestion for improving ECE 220.

Use the back for any other comments/suggestions.
