

ECE 220 Signals and Systems I
Spring 2008
March 5, 2008

What is your opinion of ECE 220 so far? This is your chance to give me feedback about the course.

You do not have to put your name on this form. When you turn in the survey, I'll check your name off my list. You will receive full RAT credit for 3/17/08 if you **answer each question on this form.** RAT credit does not depend on what you write, but you must say something for each question. Your feedback is important! Please be honest and tell me what you think.

1. Are the in-class problems useful? Why or why not?
2. How could the in-class problems be improved? Please be as specific as you can.
3. How is the lab going? Do you have suggestions for how to improve the labs?
4. Do you attend recitation? If so, is recitation useful? How could recitation be improved?
5. Is the textbook (by Lathi) easy to understand? Why or why not?
6. Name one thing you want to change about ECE 220. Say why it should be changed.
7. Name one thing you like (and do not want to change) about ECE 220. Say why you like it.

Use the back for any other comments/suggestions.
